

## Cartegraph Data Collection Team Conducts Vehicle Demonstration

Mayor Larry Smith, City Manager Wally Hill, and city staff were on hand for a quick demonstration of the vehicles that will be driving the city for a Public Works Data Collection Project.

The three-man team of Cartegraph employees will drive two vehicles collecting right of way imagery and pavement conditions on all streets throughout the city limits. The vehicles are on the road beginning today.

Please be on the lookout for the vehicles below as you travel through the city the next couple of weeks, and be patient as their work may require that they travel at slower speeds than normal traffic. If you are lucky enough to see the camera vehicle, feel free to wave!

For any questions regarding this project, please call Public Works at 951-765-3712.
