COMMERCIAL & INDUSTRIAL BUILDING COLOR PALETTE

In an effort to enhance the appearance of our City, The Hemet City Council approved Ordinance 1646 establishing an exterior paint color palette for all commercial and industrial buildings within the City limits. The purpose of establishing a fixed color palette is to limit the use of bright, fluorescent or garish colors that contrast inappropriately with surrounding properties. This effort will enhance the look of the City and contribute to attracting consumers and new businesses alike.

The adopted palette covers a broad range of earthtones and muted colors. Brighter, more intense colors are to be used only in a limited fashion for building trim and accent areas. A fee free permit is required for property owners or paint contractors when a building is to be repainted so that the proposed color scheme is reviewed by the Planning Department staff to assure consistency with the established palette.

All existing commercial and industrial structures are required to comply with the ordinance within a period of seven years, which started June 1, 2001 or at the time a building is repainted which ever comes first. Attached you will find the listing of accepted colors. Should you have any questions, you may contact the Planning Department staff at 909-765-2375.
