## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

(The following two sentences are in Spanish relaying information on the importance of this notice. Translated to English, it would read as follows: [This notice contains important information regarding your drinking water, please read the Spanish notice if it is included. If the Spanish notice is not included, please contact the water system and ask for a copy.])

Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien.

### MONITORING REQUIREMENTS NOT MET FOR CITY OF HEMET

Our water system failed to monitor as required for drinking water standards during the past year and, therefore, was in violation of the regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened, and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the 1<sup>st</sup> quarter of 2022 (January 1st-March 31<sup>st</sup>), and pursuant to CHSC, CCR, Title 22, Section 64534.2, the City was required to collect samples for Total Trihalomethanes (hereinafter “TTHM”) and Haloacetic Acids (hereinafter “HAA5”) analysis testing. This testing is on a quarterly monitoring frequency from distribution locations approved by the State Water Board for compliance with the Disinfection Byproduct Rule (hereinafter “DBPR”).

### What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant(s) we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required Sampling Frequency	Number of Samples Taken	When All Samples Should Have Been Taken	When Samples Were or Will Be Taken
(TTHM)Trihalo methanes	Quarterly	4	During the 1 <sup>st</sup> quarter. January 1 <sup>st</sup> -March 31 <sup>st</sup>	April 14th

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

### What happened? What is being done?

The required Disinfection By-Products water samples were not taken within the first quarter of 2022. The samples were taken on April 14<sup>th</sup> and are at a satisfactory level.

For more information, please contact City of Hemet at (951) 765-3710 or 3777 Industrial Ave. Hemet CA. 92545.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.

### Secondary Notification Requirements

Upon receipt of notification from a person operating a public water system, the following notification must be given within 10 days [Health and Safety Code Section 116450(g)]:

- SCHOOLS: Must notify school employees, students, and parents (if the students are minors).
- RESIDENTIAL RENTAL PROPERTY OWNERS OR MANAGERS (including nursing homes and care facilities): Must notify tenants.
- BUSINESS PROPERTY OWNERS, MANAGERS, OR OPERATORS: Must notify employees of businesses located on the property.
